

# MEASURING GUIDE

Complete this brief guide to help your sales consultant prescribe the best shade solution for your space.

**1** You'll need to have an estimated size of your ideal shade footprint and provide that information to your sales consultant.

**A** Shade footprint width: \_\_\_\_\_

**B** Shade footprint depth: \_\_\_\_\_

**2** An awning cannot be mounted lower than 8.5 feet off the ground. If you do not have enough clearance, consider a soffit or roof mount.

**C** Minimum mounting height on home: \_\_\_\_\_

**3** An awning will require between 8" and 12" of space to be mounted to your wall. If you do not have enough space, consider a soffit or roof mount. *You will also need to be sure that the span of wall where you'd like the awning to be attached to your home is free from obstructions like light fixtures and downspouts.*
