

SUPERCAST™

Supercast™ is a proprietary blend of fiberglass and polymer fortified concrete. It can be made into a variety of colors, finishes, and shapes.

- Supercast™ is typically 1/3 of the thickness of traditional concrete, with three times the strength.
- Each piece is unique and intentional color variations and pitting result in a beautiful natural stone, wood, or concrete finish.
- Supercast™ is very durable and easy to care for, simply clean and reseal to bring it back to life.
